Next meeting will be at St. Paul Church, 108 Dutch Hill Road, on Saturday January 3, 12 noon weather permitting.

2026 Event schedule is starting. Please let Jim A know of any events outside of our club.

Dome Fly's at Neville Island Dec 13 & Dec 27 see poster for times and cost.

Old Business none **New Business** None

Fuel Sales fuel is available. \$25 per gallon. Contact Bill @ 724-493-5105 to purchase

Jim Z passed on the Lewis Service award that we received from the county to Jeremiah for all of his hard work with our picnics and the raffles. Thank you Jeremiah!

Meeting Adjourned

Message from President Jim Andrews

Looking back on this past year brings to mind some great flights and some great planes. But I also remember conversations with Club members and visitors to our field. I also remember how we came together to retrieve a downed plane or to solve a set up problem. So, thank you to our Club members for making 2025 memorable.

We always start off the new year by meeting at the field on January 1st and having a flight at 10am for our First in the Air get together. Bring some cookies to share. Don't worry if you don't have a plane ready to go, we always bring a Club trainer or two to get you in the air. Snow on the field is not a problem!

Winter is the traditional build season, if you have a new plane build or repair you have been putting off your time has arrived. Bring your projects to the monthly meetings to show progress or to ask for advice.

Hope to see you at the field on Jan. 1st or the meeting on Jan. 3rd 2026!

Jim Andrews

Message from News Editor Jim Zamerski

Keep texting or emailing pictures

(any size or format) to me and any other RC related **events**, Notices, or interesting websites. They will be put on our Live Calendar, Facebook, or newsletter.

We all have too much stuff! So if you have anything you haven't used or flown in a while, send me a description, some pictures, a price, and a good contact phone number. We have many new members looking to fill their "hangars".

Our newsletter goes out to over 300 RC enthusiasts, so you will be hitting a targeted market!

Also, Members as well as non-members are welcome to sell in our newsletter.

FOR SALE

3D Lab Prints A6M2 Zero \$90

Hi Everyone. I have been 3d printing planes for a little while. I finally have the settings dialed to where I feel comfortable offering some completed prints to those who do not have a 3d printer. This listing is for the Zero from 3d labprint. It is printed in Polymaker LW-PLA (Light Weight PLA). This PLA is not quite as light as Esun or Colorfabb but the strength is far better and the looks are much better. Overall a much better finished product. 1m Wingspan

You provide the power system and your radio gear, pushrods, and hardware.

If you aren't familiar, 3d printed planes aren't perfect. They do need light sanding from time to time. The hard part has been done though. All you need to do is glue it together. I feel the assembly is easier than any of the Chinese ARFs of years past. I do 90% of the post processing so that you have as easy a time as possible. I will include all of the printed parts for one Zero airplane and a printed manual. Please let me know if you have any questions. I am always happy to answer. Please understand to fully print a plane takes 3 days roughly and this is a way to supplement the hobby for me, not my full time job. I get joy in making things as we all do being a part of this hobby.

Message from President Jim Andrews

Thank you for coming to LHMAC field! New members may not be aware of the FAA requirements of the past several years. **These are the requirements** to fly at Mammoth Park Airfield:

AMA membership, go to modelaircraft.org

Or Click or scan

Club membership, go to lhmac.org

Or Click or scan

FAA registration, go to faadronezone.faa.gov there are 2 classes of registration, one for **recreational users (us)**, and one for commercial users. **For us**, recreational users, you will get one registration number that will be good for all your aircraft.

TRUST (The Recreational UAS Safety Test) go to modelaircraft.org/trust to take the test.

Or Click or scan

Remember, model planes and helicopters are considered drones by the FAA. After you complete the 4 steps, **make labels for each of your aircraft** that has the following things on it,

1. Contact info (Name and Phone #)
2. AMA number
3. FAA registration number

Attach this label to each of your aircraft. **FAA# Must be on the outside of your aircraft**

All other info can go anywhere on the aircraft.

While flying, you need to have 4 pieces of information in your possession:

1. Your AMA membership card
2. Your LHMAC membership card
3. Your FAA registration card (Small UAS Certificate of Registration)
4. Your TRUST Completion Certificate

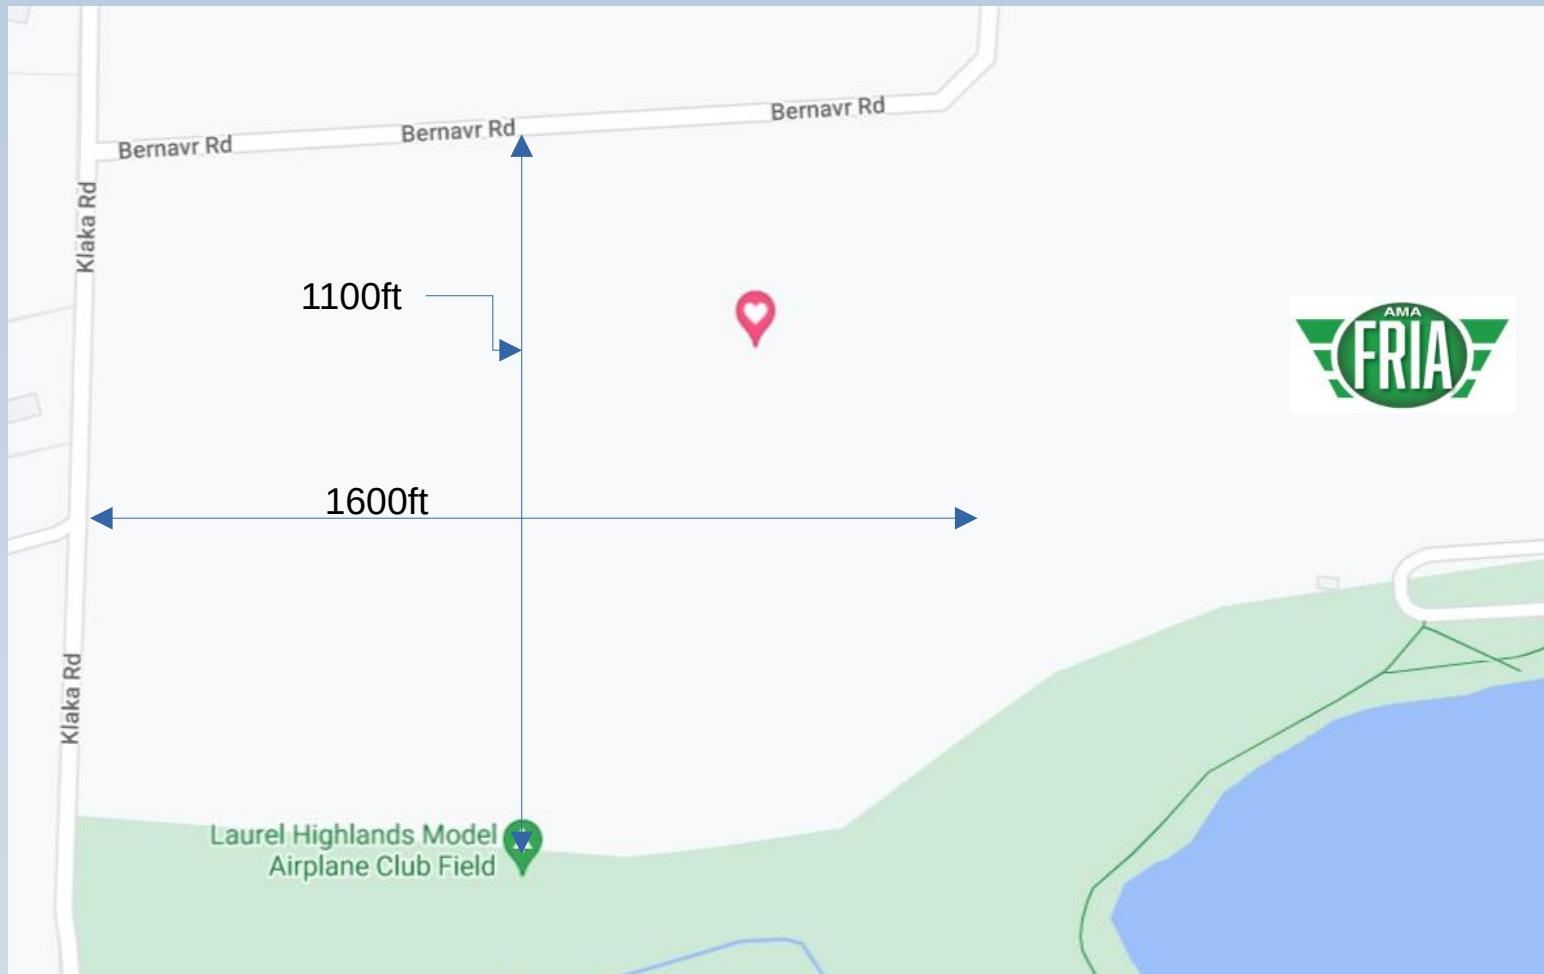

At first it seems complicated but really isn't. The TRUST certificate is a lifetime certificate. The FAA registration is good for 3 years for \$5 and can be renewed keeping the same number. LHMAC is a yearly membership and AMA can be yearly, 2 years, or lifetime membership.

See you at the field!

Jim Andrews

GAS/GLOW FLIGHT QUALIFICATION AND ELECTRIC FLIGHT QUALIFICATION

Qualification sessions must ensure that the flyer shows knowledge of and practices the field rules and can safely and competently execute the following:

- I. Set-up and check aircraft, engine and radio correctly prior to flight.**
- II. Make take-offs to the left and right smoothly and under control (two each).**
- III. Make left and right hand rectangular patterns with proper turns at a safe altitude (two each).**
- IV. Make horizontal figure 8 patterns parallel with the flight line with proper turns at a safe altitude. (two each)**
- V. Make landing approach and landings from the left and right smoothly and under control (two each).**
- VI. Make simulated or real dead-stick landings on the flying site safely and under control (one each).**
- VII. Keep within the designated field boundaries at all times.**
- VIII. Any fail on a section of testing will require a re-test of that section.**
- IX. Qualification is only valid if completed in the presence of a qualified club member and a class qualified (gas class or electric class) designated instructor or club officer.**
- X. Pilots with a gas/glow qualification may fly any aircraft that is AMA legal.**
- XI. Pilots with an electric qualification are not permitted to fly gas/glow aircraft without the use of an instructor .**
